Meet GeoEngineers

Trusted earth science and technology advisors

GeoEngineers specializes in crafting unique environmental, ecological and geotechnical solutions for the Water and Natural Resources, Transportation, Energy, Federal and Development markets.

Trustworthy Advice, Great Service

More than 30 years ago, GeoEngineers' founders envisioned an independent company of technical experts known for their integrity and strong client relationships. We have made good on our founders' vision, earning a reputation as creative thinkers and trusted advisors who work in partnership with our clients on their most challenging projects. Thanks to these enduring client bonds, GeoEngineers has grown from a small consulting partnership to a talented, multidisciplinary team of more than 300 people who work in 12 offices nationwide.

Earth Science + Technology

GeoEngineers offers our clients a diverse suite of services focused on the dynamic intersection of human needs and natural environments. In addition, our Applied Technology group provides strategic planning, custom application development and an array of solutions to help you manage and make sense of volumes of complicated data. The result is what we call Earth Science + Technology—the unique combination of skills and perspectives we bring that provides value on every project.

Our People

Our dedicated staff includes geotechnical engineers, geologists, environmental scientists and engineers, hydrogeologists, hydrologists, river scientists, toxicologists, chemists and technology specialists—all backed by talented business, marketing and administrative professionals.

Each employee has a highly developed specialty, but what's common to all is a passion for doing great work that makes a positive impact for clients now and in the future. We're independent thinkers and superior collaborators who dig deep to understand your project and then help you understand and weigh your options. We work in partnership with you to find and implement the solution that best fits your needs.

GeoEngineers believes in broad-based employee ownership, and the majority of us have a financial stake in the company. That means doing great work is not only good for our clients, it's good for us as well. We're truly invested. [Meet our staff](#) and we think you'll agree.

Your Projects

If you build communities, harness, manage and sustain the earth's resources or move products and people, we have unmatched expertise and the global reach to serve you. Since 1980, we have completed more than 30,000 successful projects worldwide for clients in the Energy, Transportation, Water and Natural Resources, Development and Federal markets.

Our results offer lasting benefits to clients, communities and the environment. Take a look at [some of our projects](#) to learn more about what we can do for you.

We Put You First

Our philosophy is summed up in our tagline, *We Find a Better Way*®. GeoEngineers strives to live up to our reputation for outstanding client service, and we believe that the best client relationships are based on teamwork, integrity and going the extra mile to help you meet your goals. We look forward to working with you to find solutions and enhance the world we share.
